4-H Conservation Club

*The 4-H Youth Development Program, the largest youth serving program in the United States, provides informal educational opportunities to youth in urban, rural, and suburban communities through local clubs, school programs, special interest clubs, and individual membership. The goals of the 4-H Program are to increase knowledge on a variety of project areas while enhancing life-skills such as **decision-making, public speaking, and leadership**. We try to accomplish these goals through group interactions such as: communicating, working cooperatively, and being responsible. The youth learn by experiential activities - preparing, designing, and evaluating their projects. For more information about 4-H visit - Westmoreland County Cooperative Extension (link is: <http://westmoreland.extension.psu.edu/> or you can also use http://westmoreland.extension.psu.edu/4-H/What_is_4-H.htm)*

The 4-H Conservation Club is a 4-H Project Club focusing on the subjects of Conservation: Wildlife Conservation, Water Conservation and Forestry. Project Book meetings will be held at PV Park, in Murrysville.

To be eligible to join our new club - interested youth must be residents of Westmoreland County and between the ages of 5 and 19 as of January 1st.

For more information about this specific 4-H club contact Bonnie Belak, the 4-H Conservation Club Organizational Leader, at 724-327-6885.
